REAL STORY + CHARACTER SHEET + MASTER PROMPT

Cinematic AAA game-character teaser • 15 seconds • 9:16 • exactly 10 cuts

1. THE REAL STORY OF TAITESENA

Pasal■ha Taitesena, born **Ralthathchhunga**, was a famous Mizo warrior, hunter and volunteer. He is remembered as an example of *Tlawmngaihna*, the Mizo ethic of selflessness, courage, discipline and service to others. Online biographical sources give his birth as January 1882 at Khawrihnimah and his death in 1904 at Sehrmun. He was from a Khiangte family, and the name Taitesena is associated with his notably healthy red cheeks as a child. He was known for discipline, hunting ability and athletic skill, including javelin throwing, shotput and wrestling.

One account describes how the chief Hrangvunga tested the young men of his village to discover who could be trusted with a difficult night-time errand in darkness and heavy rain. Taitesena immediately volunteered. The chief later revealed that the errand was a test of character; Taitesena's readiness, reliability and consideration for the chief impressed him. Taitesena was also remembered for his self-control and for not complaining or becoming angry.

Taitesena's final story is tied to a man-eating tiger that had terrorized Sehrmun. Taitesena and fellow Pasal■ha Zingkela Ralte, Vuntawna Palian and Dozika Ralte joined the effort to confront the animal. During the fight the Pasal■ha were seriously injured. Taitesena suffered a fractured thigh, while the villagers eventually overpowered and killed the tiger. Despite their severe wounds, the Pasal■ha refused to be carried on stretchers. Accounts say that Taitesena and the others did not complain of pain during their final moments. Taitesena died in 1904.

Creative boundary: this project is a cinematic game-character interpretation of a historical Mizo folk hero. The historical foundation is Taitesena's identity, his Pasal■ha status, hunting and warrior reputation, discipline, selflessness and the Sehrmun tiger story. The exact cinematic costume construction, weapon presentation, graphics and supernatural/game-like presentation are creative design choices, not presented as literal historical reconstruction.

GLOBAL FOUNDATION

@■■■1 is the only and absolute identity source. Use all four views to keep the same warrior: exact face, eyes, nose, mouth, jawline, moustache/stubble, long black hair and braids, feathered Vakiria headdress and red-black headband, muscular anatomy and silhouette, bare arms and legs, bare torso, crossed black woven puan sash with exact red/white striping, fringed traditional skirt and construction, brass/bronze ornamented phaw shield with crimson tassels, arm wraps, bracelets, jewelry, and broad Lu Lak Chem with exact shape, handle, weathering and position across the shoulders. Preserve subtle natural healthy warm-red cheek coloration as skin, never blush.

@■■■2 (pasaltha-warrior-visual-authority-v2.png) is ONLY a cinematography and visual-quality reference. It controls lighting, atmosphere, camera language, depth of field, fog, rim light, color treatment and presentation quality. It must NEVER control or contribute the warrior's face, body, costume, clothing construction, accessories, armor, shield, weapon, hairstyle or character design. Never merge, average or borrow character elements between @■■■1 and @■■■2. If they conflict, follow @■■■1. Exactly one warrior.

REFERENCE BINDINGS

@■■■1 is the sole subject identity authority for face, body, bare torso, exact crossed sash, skirt, accessories, shield, headdress and Lu Lak Chem. Do not inherit its gray studio background or horizontal turnaround layout.

@■■■2 contributes cinematography and presentation only; it never overrides @■■■1.

CINEMATOGRAPHY + GRAPHICS

Photorealistic AAA game cinematography, dark historical-warrior fantasy, premium editorial presentation, Unreal Engine 5 quality. Oversized condensed bold sans-serif, white/pale grey, thin lines, minimal grids, brackets, circles, tracking marks, wipes, compression, scaling, fragmentation, 2.5D occlusion, masked transitions and one restrained glitch. No neon, cyberpunk HUD, clutter or random numbers. Render supplied text exactly and legibly.

SOUND PLAN

Visual audio is off. Use a picture-synchronized cinematic score with low ceremonial percussion, restrained organic texture, breath/air and precise accents for blade, grip, typography, identity reveal, eye cut, legend rise and final title. Foley, if generated, should remain physical and subtle: blade movement, shield resonance, cloth, feathers and final impact.
